

Whole House Surge Suppression

Benefit from protection provided by a *Sycom* whole-house, meter-based surge protector. This device plugs in under your electric meter and is designed to protect appliances not protected by a plug-in surge suppressor, such as washer/dryer, refrigerator and oven. We recommend using additional plug-in suppressors to protect sensitive electronics such as computers, televisions and satellite equipment.

An LPEA serviceman will install this device for you, and we will bill your account after installation.

The cost for an installed Sycom 200 Amp Meter-based suppressor is \$160.00.
