

New Construction Check List

Below is a checklist to assist you with your new construction project:

In order to expedite the assignment of your job to a staking engineer, complete the following:

- Complete and sign the "Application for Electric Service" with accurate Service Address
- Complete the "Load Data Sheet", which contains crucial information to ensure an appropriately designed electric service
- Pay the required Design Fee (Credit card payments are not accepted for New Construction)
- Pay the Service Deposit, if required (See the "Deposits" letter enclosed in this packet for your options)
- Provide copy of Warranty Deed

Upon receipt of the above, the first available staking engineer will contact you to arrange an appointment to meet at the site to discuss your job. Please make sure property pins are in place or property boundaries are marked prior to this meeting.

After the on-site meeting, the staking engineer will draw your job, compute the construction cost, and contact you.
(NOTE: The cost you receive is good for 30 days.)

Job will be released to construction for scheduling after the following are completed:

- Sign and notarize necessary easements and contracts
- Pay construction costs

Contact LPEA at (970) 247-5786 and ask to speak with the Line Superintendent, in Durango (La Plata County) or Pagosa Springs (Archuleta County), to coordinate scheduling for construction before you start trenching or clearing right-of-way. Be sure to reference your LPEA Work Order Number when you call.

Clear right-of-way as required.

For Underground Line Extensions

Prior to digging trench, obtain:

- Existing underground utility locations with the Utility Notification Center of Colorado at (800) 922-1987 or 811
- Any required excavation permits
- Verify that trench location will be within dedicated right-of-way

Dig your trench. All trenching must be per LPEA specifications. (A \$600 fee will be charged to the customer if LPEA construction crews show up at the job site and the trench is not ready.)

Notify the LPEA Line Superintendent that you are ready for construction to proceed.

LPEA extends line and installs electrical facilities to metering point. *You are responsible for everything past the metering point.*

Contact Colorado State Electrical Inspector to inspect your service;

(303) 869-3456 for La Plata County

(303) 869-3463 for Archuleta County

Contact LPEA to have your meter installed after:

- Trench has been backfilled (if underground electrical facilities are installed)
- Your service has been inspected and green-tagged by the Colorado State Electrical Inspector

LPEA energizes line and installs meter

If you have any questions or concerns, please feel free to contact us at any time.

Service is: Existing New Type of Business: _____
Applicant is: Property Owner Tenant Contractor
Name of Principal or Authorizing Agent: _____
Business is: Corporation Partnership Proprietorship Notes: _____

The undersigned (hereinafter called the "Applicant") hereby applies for and agrees to purchase electric energy from the La Plata Electric Association, Inc. (hereinafter called the "Association") upon the following terms and conditions:

1. The Applicant will comply with and be bound by the provisions of the Articles of Incorporation and Bylaws of the Association, and such rules, regulations, and policies as may periodically be adopted by the Board of Directors of the Association.
2. The Applicant agrees, when electric service is available to these premises, to pay the monthly charge in accordance with the applicable rate schedule. Applicant understands and agrees that the Association's responsibility does not extend beyond the point of the Applicant's ownership of the Applicant's service wires with the exception of the electric meter or pre-pay metering and associated equipment.
3. The Applicant hereby agrees to support and assist the Association in obtaining the right, privilege and easement to construct, operate and maintain the necessary electric facilities together with full right of ingress and egress, as may be necessary to extend and maintain this service. If the Association must purchase or condemn right-of-way, it will do so at the sole expense of the Applicant. The Applicant agrees it shall be solely responsible for the Association's actual expenses for: the acquisition, purchase or condemnation of right-of-way; surveying; special archaeological or environmental studies and permitting; the expenses associated with the construction of roads and reclamation of land damage. The Applicant shall pay to the Association such estimate of costs prior to the Association's commencement of construction. No portion of such payment of expenses is refundable to the Applicant. Any necessary subsequent costs related to permitting and/or renewals or extensions of rights-of-way shall be borne solely by the Applicant, his/her/its heirs, successors or assigns.
4. The Applicant hereby also grants the Association the right to cut and trim trees and shrubbery to the extent necessary to keep them clear of the electric facilities. All boring and trenching provided by the Applicant for the installation of the underground system must be located within the dedicated easements and the Applicant hereby warrants that the location of all required boring and trenching provided by the Applicant so conforms. Any boring and trenching found now, or in the future, outside of the dedicated easement will be relocated within the dedicated easements, and all costs for the relocation will be the responsibility of the Applicant.
5. The Applicant agrees to meet standards set forth under the Institute of Electrical and Electronics Engineers (IEEE) standard "519-1992—Harmonic Voltage and Current Limits." In the event the Association finds the Applicant's service is not within compliance of these standards, the Association will require the Applicant to come into compliance within sixty (60) days after receiving written notice from the Association. If not in compliance after sixty (60) days, the Association will disconnect the Applicant's service until such time as the Applicant can demonstrate compliance.
6. Upon mutual acceptance, this application for electric service shall constitute a valid binding agreement between Applicant and the Association and shall continue in force until canceled by the Applicant with at least a twenty-four hour prior written notice, which must be received by the Association during regular office hours. This agreement may be terminated by the Association for any reason authorized by the Association's Bylaws or for a material breach of this agreement, including failure of the Applicant to comply with the rules, regulations and bylaws of the Association. The Applicant will remain liable for all charges incurred for electric service herein until the Association is advised of a change in the service.
7. The Applicant agrees to pay a deposit with the Association, such service security deposit as is required by the rules and regulations of the Association. The Applicant hereby grants and Association takes a security interest in said deposit as collateral for service to be applied by the Association, upon any non-payment, termination of service, insolvency, or petition for bankruptcy by undersigned Applicant. The Association shall apply said deposit to bills due the Association and refund any unused portion of deposit upon termination of electric service to the Applicant.
8. If this agreement is for the installation of new service it should be noted that, if this agreement is cancelled subsequent to design and engineering, but prior to construction and connection of new electric service, the Applicant shall be held liable for all costs incurred by the Association in the performance of such activities. It should be further noted that, new electric service and temporary construction service under this agreement are available without actual connection for only one (1) year, thus Applicant should plan to have permanent wiring completed and must request actual connection within that year, or this agreement will terminate and Applicant shall pay the Association for any outstanding service charges arising from this agreement.
9. The Association will schedule construction projects with the Applicant for a specific date upon request by the Applicant or their representative. Any cost overrun attributable to delays or changes caused by the Applicant or their representative will be the responsibility of the Applicant. If your trench will not be ready on the agreed date, you must notify the Association's construction supervisory personnel on or before 7 a.m. of the agreed date. If the Association's construction crews show up and, for reasons attributable to a failure of the Applicant or their representative, cannot perform required construction, a \$600 fee will be charged to the Applicant.
10. Unless Applicant also signs the Disclaimer of Membership below, this Application shall constitute an application for membership in the Association. As a member of the Association, Applicant assumes no personal liability or responsibility for any debts or liabilities of the Association, and it is expressly understood that Applicant's private property cannot be attached for any such debts or liabilities of the Association. As a member of the Association, the Applicant agrees to comply with and be bound by the provisions of the Articles of Incorporation and Bylaws of the Association, as the same may periodically be lawfully amended. Each member of the Association, or in the case of a joint membership, the holders thereof jointly, or any one of them, but not all, shall be entitled to one (1) vote and no more upon each matter submitted to a vote of the Association's members.

PROCEDURE FOR PROCESSING SERVICE REQUESTS

The following procedure has been established as the most efficient means to provide electric service in an orderly manner without delay. This procedure works best when all parties cooperate to provide accurate, complete, and timely data.

1. It is the responsibility of the engineer, architect, contractor, builder or owner to submit to LPEA's Engineering Department a service request for the proposed project. The request must provide sufficient lead-time for engineering, determination of charges, and construction.
2. The engineer, architect, contractor, builder or owner must include with all requests for service a completed load data sheet and one copy of a plot plan. The plot plan should show preferred service and meter locations and a single-line diagram of the electrical layout. Final service and meter locations shall be determined by LPEA's Engineering Department.
3. **Additional Charges:** LPEA designs to the specific information on this form. Significant changes may result in additional charges. Charges may include, but not be limited to, additional engineering, equipment or conductor change-out and incurred labor.

**** DEPOSITS ****
New Construction
Commercial Electric Service

Commercial businesses new to La Plata Electric Association's system are required to pay a service deposit, which is intended to guarantee payment of monthly electric bills. The deposit amount is as follows:

- Commercial Up to \$500

Alternatives to waive the deposit are the following:

1. Businesses existing within LPEA's service area for 12 consecutive months or more, who are requesting new service for the same business or a like business, can have their LPEA credit history evaluated. This may or may not result in the deposit being waived.
2. An irrevocable letter of credit from a bank or a bond, effective for 12 months, may be provided to LPEA in lieu of a deposit.

Your deposit will be held until 12 consecutive monthly bills have been paid in a timely manner. If acceptable credit has been established after 12 months, the deposit (including interest) is refunded as a credit to your account or as a check. The interest rate is subject to change the first of every year.

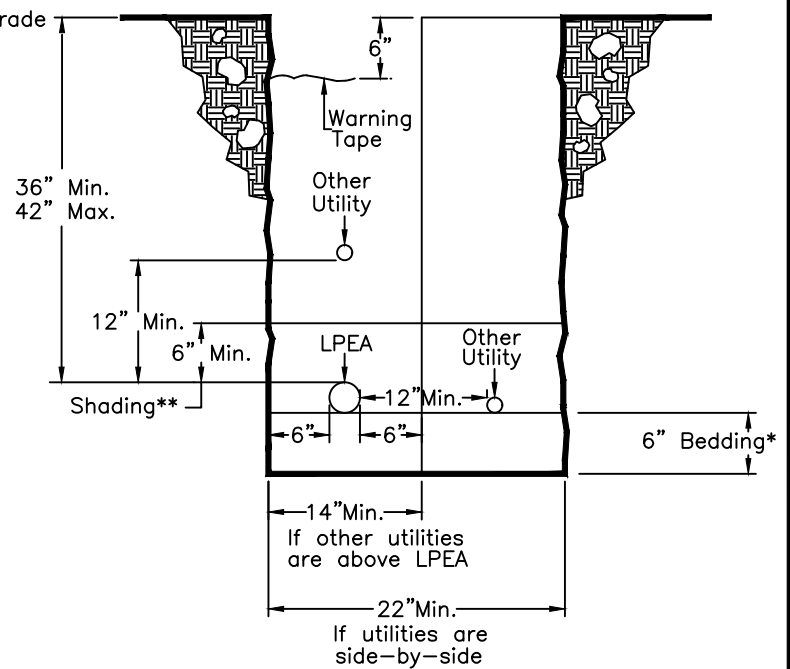

If a deposit is required, it will be billed on your first bill after the meter is set.

If you have any questions, please feel free to call or write and we will be happy to help. We look forward to serving you in the future.

Highlights

from the “Line Extension Policy” and Other New Service Info

All electric line extensions must be installed according to LPEA’s current “Line Extension Policy” and “Electric Service Regulations”. These documents are available online at <https://lpea.coop/policies> or copies will be provided upon request.

LPEA/CUSTOMER INSTALLED EQUIPMENT

LPEA shall install all equipment necessary to complete your service requirements. This may include:

- Primary cable
- Transformers
- Secondary/service wire to point of metering
- Meter pedestal adjacent to the transformer
- Meter

Electric service will be provided to an Association-owned meter. Installation, ownership, and maintenance of the service wire from the meter to the load location are the responsibility of the Applicant. Law prohibits LPEA from performing work on the customer’s side of the disconnect switch, as well as the tampering of LPEA-owned facilities by others.

The customer’s installation must be inspected and green-tagged by the Colorado State Electrical Inspector in a manner visible to the LPEA representative before a meter will be installed.

TRENCHING AND BEDDING

All boring, trenching, bedding, and backfilling are to be provided by the customer without cost to LPEA and with provisions made for other utilities in accordance with their requirements. Please see the “Underground Trench and Bedding Specifications” included in this packet for more detail.

- In trenches of normal depth, electrical conduit will be placed at a minimum depth of thirty-six (36) inches and a maximum depth of forty-two (42) inches.
- In trenches of shallow depth, electrical conduit must be covered with red-dyed concrete (Flow-fill is not acceptable). Installation must be inspected by an LPEA representative.

Highlights

from the “Line Extension Policy” and Other New Service Info

- Warning tape is required at six (6) inches below final grade in all trenches.
- Conduits installed in roadways are to be backfilled and compacted in a manner consistent with road compaction requirements of the local governing body (state, county, city, town, etc.).
- No LPEA lines will be energized until warning tape is installed and the trench has been completely backfilled.

LOCATION OF EXISTING UNDERGROUND FACILITIES

State law requires location of all underground utilities present on your property prior to any digging. Locates are arranged by calling the Utility Notification Center of Colorado (UNCC) at (800) 922-1987.

RIGHTS-OF-WAY/EASEMENTS

LPEA requires easement for all new electric lines. Typical easement width is 20 feet. If it is necessary to cross another’s property to serve the customer, an LPEA easement is required from the other property owner.

Any special considerations of easements and/or permits must have LPEA approval.

Easements must be written, approved, signed and notarized before the job is released to construction. Any costs associated with the acquisition of right-of-way are the responsibility of the customer.

TREE TRIMMING

To increase safety, reduce outages, and prevent expensive damage, LPEA will periodically trim or remove vegetation from the electric line right-of-way.

LPEA's Time-of-Use Program can put time on your side! Save energy and dollars by shifting electricity usage to off-peak hours.

How does the Time-of-Use Program work?

To participate in Time-of-Use, sign up for special billing and receive a much lower rate for using electricity during off-peak hours. The more electricity usage you shift to off-peak hours, the more energy and dollars you save.

What are the rates and time periods?

- Off-peak rate: 5.9¢ per kilowatt-hour, Monday – Saturday, 10 p.m.-6 a.m. and 9 a.m.-5 p.m.; all day Sunday; plus Thanksgiving and Christmas
- On-peak rate: 23¢ per kilowatt-hour
- Base Charge per month: \$20

[The regular residential rate is 12.56¢ per kilowatt-hour with a \$21.50 Base Charge.]

Keys to saving with the TOLL program:

- Install timers on your large power consumers (electric water heaters, electric thermal storage units, etc.), ensuring they run during off-peak hours.
- Do the following during off-peak hours:
 - Run your dishwasher
 - Wash and dry clothes
 - Run self-cleaning oven cycle
- Install programmable thermostats to automatically control space heat; load control equipment; timers on stock tank heaters; and timers on heat tape.

We're happy to help make Time-of-Use work for you - and there's no cost to switch! Give us a call with any questions.

Energy Efficiency Credits

☀️ **WATER HEATERS** ☀️

Receive money back for installing an electric water heater.

Electric Water Heater Credits

- \$75 for Marathon water heaters, or any electric water heater with a lifetime tank warranty
- \$55 for all other electric water heaters
- See Heat Pump Rebate Sheet for heat pump water heaters

Timer Credit

- Up to \$25 per timer installed, not to exceed 50% of material cost

Eligibility Requirements:

- 30-55 gallon capacity and 6-year tank warranty
- Must meet minimum energy factor rating
- Installations must be in LPEA's service territory
- Customer must provide LPEA with proof of purchase
- LPEA reserves the right to inspect installations

LPEA recommends that customers request a walk-through energy assessment on homes where electricity is the primary heating system.

TRI-STATE
Generation and Transmission
Association, Inc.

LPEA and its power supplier Tri-State Generation and Transmission will pay credits to their consumers for the aforementioned electric heating systems, and energy efficient products and programs. All credit must be requested within 120 days of installation. For detailed information go to: http://www.lpea.coop/programs_services/efficiencycredits.htm. Contact LPEA for more information at 970.247.5786

Energy Efficiency Credits

☀ THERMAL STORAGE HEATERS ☀

Receive money back for installing permanent, controlled electric heating.

Permanent Electric Heat Credits

- \$30/kW for Electric Thermal Storage [ETS] heater controlled by a timer or master control system
- \$30/kW for Thermal Slab heating controlled by a timer or master control system

Timer Credit

- Up to \$25 per timer installed, not to exceed 50% of material cost

Eligibility Requirements:

- New or replacement installation
- Minimum 1 (one) kilowatt [1,000 watts] capacity heater
- Timing device required for use of off-peak hours, controlled by timer or master control system
- Installations must be in LPEA's service territory
- Customer must provide LPEA with proof of purchase
- LPEA reserves the right to inspect installations

LPEA recommends that customers request a walk-through energy assessment on homes where electricity is the primary heating system.

TRI-STATE
Generation and Transmission
Association, Inc.

LPEA and its power supplier Tri-State Generation and Transmission will pay credits to their consumers for the aforementioned electric heating systems, and energy efficient products and programs. ☀ HEAT PUMPS ☀

Receive money back for installing permanent, electric heating.

AIR SOURCE HEAT PUMPS

Credits:

- \$300/ton for units rated from 15 to 17 Seer
- \$450/ton for units greater than 17 Seer
- \$100/unit additional incentive for central air source with integrated controlled ETS backup in lieu of a separate ETS incentive
- \$85/unit for terminal units [through-the-wall mounted heat pumps]

Eligibility Requirements:

- Minimum 15 Seer
- Minimum equipment size is 1 ton [12,000 Btuh]
- Energy Star® rating not required

CENTRAL GROUND SOURCE HEAT PUMPS

Credits:

- \$500/ton

Eligibility Requirements:

- Minimum 3/4 ton [9,000 Btuh]
- Energy Star® rating not required

HEAT PUMP WATER HEATERS

Credits:

- \$350/unit

Eligibility Requirements:

- 30 gallon minimum

LPEA recommends that customers request a walk-through energy assessment on homes where electricity is the primary heating system.

A close-up photograph of a person's hand holding a structure made of pennies. The pennies are arranged to form the outline of a house, with the roof and walls visible. The background is a bright, sunny outdoor scene with a blue sky and green grass.

What goes around...

Pennies make a difference in our community – especially in tough economic times. Our area non-profit organizations and charitable agencies are seeing dramatic declines in their donations. This is where the La Plata Electric Round Up Foundation steps in to help.

The Round Up Foundation is a non-profit arm of your electric company, overseen by a volunteer board with representatives from all LPEA districts. Round Up is funded when our members opt to “round-up” their electric bills to the next higher dollar amount (an average of 50 ¢ per month). It may not seem like a lot, but collectively, those pennies add up, allowing Round Up to then offer grants to our very worthwhile community agencies supporting seniors, children, the homeless, the hungry and more.

Please sign up to add your pennies...

It all comes around to make our community stronger.

I understand a little bit will help a lot.

YES, please round up my electric bill.

All information remains confidential at La Plata Electric Association.
