

### New Construction Check List

Below is a checklist to assist you with your new construction project:

In order to expedite the assignment of your job to a staking engineer, complete the following:

- Complete and sign the "Application for Electric Service" with accurate Service Address
- Complete the "Load Data Sheet", which contains crucial information to ensure an appropriately designed electric service
- Pay the required Design Fee (Credit card payments are not accepted for New Construction)
- Pay the Service Deposit, if required (See the "Deposits" letter enclosed in this packet for your options)
- Provide copy of Warranty Deed

Upon receipt of the above, the first available staking engineer will contact you to arrange an appointment to meet at the site to discuss your job. Please make sure property pins are in place or property boundaries are marked prior to this meeting.

After the on-site meeting, the staking engineer will draw your job, compute the construction cost, and contact you.  
(NOTE: The cost you receive is good for 30 days.)

Job will be released to construction for scheduling after the following are completed:

- Sign and notarize necessary easements and contracts
- Pay construction costs

Contact LPEA at (970) 247-5786 and ask to speak with the Line Superintendent, in Durango (La Plata County) or Pagosa Springs (Archuleta County), to coordinate scheduling for construction before you start trenching or clearing right-of-way. Be sure to reference your LPEA Work Order Number when you call.

Clear right-of-way as required.

#### For Underground Line Extensions

Prior to digging trench, obtain:

- Existing underground utility locations with the Utility Notification Center of Colorado at [\(800\) 922-1987](tel:8009221987) or [\(811\)](tel:811)
- Any required excavation permits
- Verify that trench location will be within dedicated right-of-way

Dig your trench. All trenching must be per LPEA specifications. (A \$600 fee will be charged to the customer if LPEA construction crews show up at the job site and the trench is not ready.)

Notify the LPEA Line Superintendent that you are ready for construction to proceed.

LPEA extends line and installs electrical facilities to metering point. *You are responsible for everything past the metering point.*

Contact Colorado State Electrical Inspector to inspect your service;  
[\(855\) 454-0069](tel:8554540069) for West Half of La Plata County (Durango, Hesperus, Hermosa)  
[\(855\) 451-9793](tel:8554519793) for East Half of La Plata County (Bayfield, Ignacio, Vallecito)  
[\(855\) 470-4718](tel:8554704718) for Archuleta County

Contact LPEA to have your meter installed after:

- Trench has been backfilled (if underground electrical facilities are installed)
- Your service has been inspected and green-tagged by the Colorado State Electrical Inspector

LPEA energizes line and installs meter

If you have any questions or concerns, please feel free to contact us at any time.

LA PLATA ELECTRIC ASSOCIATION, INC.

Application for Electric Service and Membership Certificate

Developer-Subdivision

Revised 1/5/2015

Name: Title: DBA: Tax ID #: Service Address: City: Subdivision: # of Lots Lot #'s: Billing Address: City/State: Zip: Home Phone: Cell Phone: Work Phone: Fax Number: Date Service Wanted: Email Address: Service is: Existing New Type of Business: Applicant is: Property Owner Tenant Contractor Name of Principal or Authorizing Agent: Business is: Corporation Partnership Proprietorship Notes:

The undersigned (hereinafter called the "Applicant") hereby applies for and agrees to purchase electric energy from the La Plata Electric Association, Inc. (hereinafter called the "Association") upon the following terms and conditions:

- 1. The Applicant will comply with and be bound by the provisions of the Articles of Incorporation and Bylaws of the Association... 2. The Applicant agrees, when electric service is available to these premises, to pay the monthly charge... 3. The Applicant hereby agrees to support and assist the Association in obtaining the right, privilege and easement... 4. The Applicant hereby also grants the Association the right to cut and trim trees and shrubbery... 5. Upon mutual acceptance, this application for electric service shall constitute a valid binding agreement... 6. The Applicant agrees to pay a deposit with the Association... 7. If this agreement is for the installation of new service it should be noted that... 8. The Association will schedule construction projects with the Applicant for a specific date... 9. Unless Applicant also signs the Disclaimer of Membership below, this Application shall constitute an application for membership...

Owner/Officer Applicant Date: Applicant

DISCLAIMER OF MEMBERSHIP (OPTIONAL)

The undersigned hereby chooses not to become a member of La Plata Electric Association, Inc.

As a customer of the Association, the Applicant agrees to comply with and be bound by the provisions of the Articles of Incorporation and Bylaws, as the same may periodically be lawfully amended.

\* \* DEPOSITS \* \*

*For Commercial Electric Service*

Commercial businesses new to La Plata Electric Association's system are required to pay a service deposit, which is intended to guarantee payment of monthly electric bills. The deposit amounts are as follows:

- All Small Commercial (< 50 kW) \$1,200.00
- Industrial and Large Commercial (>= 50 kW) deposits are three times the estimated monthly billing of the electrical load requirements of your business, or a similar business for which La Plata Electric has usage history

Alternatives to waive the deposit are the following:

1. Businesses existing within LPEA's service area for 12 consecutive months or more, who are requesting new service for the same business or a like business, can have their LPEA credit history evaluated. This may or may not result in the deposit being waived.
2. An irrevocable letter of credit from a bank or a bond, effective for 36 months, may be provided to LPEA in lieu of a deposit.

Your deposit will be held until 36 consecutive monthly bills have been paid in a timely manner. If acceptable credit has been established after three years from the permanent connect date of your service, the deposit including interest is refunded to your account. The interest rate is subject to change the first of every year.

The deposit is due upon application.

If you have any questions, please feel free to call or write and we will be happy to help. We look forward to serving you in the future.

# Highlights

from the "Line Extension Policy" and Other New Service Info

*All electric line extensions must be installed according to LPEA's current "Line Extension Policy" and "Electric Service Regulations". These documents are available online at <https://lpea.coop/policies> or copies will be provided upon request.*

## DEVELOPER RESPONSIBILITIES

Prior to LPEA personnel staking the development, the developer shall:

- Provide an accurate plat of the development, including dedicated easements, to be used in design and cost estimating.
  - Preliminary plats may be used for early design and cost estimating; however, a hard copy of the final, recorded plat must be provided prior to preparation of contracts or the collection of contract money.
- Prior to staking of equipment locations, all lot corners and property lines must be identified, clearly marked and final grade must be established.

## DEVELOPMENT DESIGN

LPEA staking personnel use the following guidelines in development design:

- Provision for electric service to all lots of the development will be made.
- Whenever practicable, LPEA equipment will be located at front lot corners and common to roadways, streets and alleys in order to provide access for installation, maintenance, replacement and/or removal of the equipment. The design shall, also, incorporate an equipment set-back of not less than ten (10) feet from the edge of the roadway or five (5) feet from the edge of the sidewalk to allow for snow removal and roadway maintenance.
- Forty-two (42) inches of clearance (a minimum of thirty-six (36) inches) must be maintained between sides and backs of LPEA primary equipment (i.e. pad mount transformers, junction boxes, switchgear) and all communication equipment. A minimum of ten (10) feet of clear space containing no obstructions is required in front of LPEA primary equipment.
- Whenever practicable, the design shall incorporate an alternate source of power to the development to allow for load switching, load balancing and a back-up source of power in case of equipment failure or failure caused by dig-in.

# Highlights

from the "Line Extension Policy" and Other New Service Info

## LPEA/CUSTOMER INSTALLED EQUIPMENT

LPEA shall install all equipment necessary to complete your service requirements. This may include:

- Primary cable
- Transformers
- Secondary/service wire to point of metering
- Meter pedestal adjacent to the transformer
- Meter

Electric service will be provided to an Association-owned meter. Installation, ownership, and maintenance of the service wire from the meter to the load location are the responsibility of the Applicant. Law prohibits LPEA from performing work on the customer's side of the disconnect switch, as well as the tampering of LPEA-owned facilities by others.

The customer's installation must be approved and tagged by the Colorado State Electrical Inspector in a manner visible to the LPEA representative before a meter will be installed.

## TRENCHING AND BEDDING

All boring, trenching, bedding, and backfilling are to be provided by the customer without cost to LPEA and with provisions made for other utilities in accordance with their requirements. Please see the "Underground Trench and Bedding Specifications" included in this packet for more detail.

- In trenches of normal depth, electrical conduit will be placed at a minimum depth of thirty-six (36) inches and a maximum depth of forty-two (42) inches.
- In trenches of shallow depth, electrical conduit must be covered with red-dyed concrete (Flow-fill is not acceptable). Installation must be inspected by an LPEA representative.
- Warning tape is required at six (6) inches below final grade in all trenches.

# Highlights

from the "Line Extension Policy" and Other New Service Info

- Conduits installed in roadways are to be backfilled and compacted in a manner consistent with road compaction requirements of the local governing body (state, county, city, town, etc.).
- No LPEA lines will be energized until warning tape is installed and the trench has been completely backfilled.

## LOCATION OF EXISTING UNDERGROUND FACILITIES

State law requires location of all underground utilities present on your property prior to any digging. Locates are arranged by calling the Utility Notification Center of Colorado (UNCC) at (800) 922-1987.

## RIGHTS-OF-WAY/EASEMENTS

LPEA requires easement for all new electric lines. Typical easement width is 20 feet. If it is necessary to cross another's property to serve the customer, an LPEA easement is required from the other property owner.

Any special considerations of easements and/or permits must have LPEA approval.

Easements must be written, approved, signed and notarized before the job is released to construction. Any costs associated with the acquisition of right-of-way are the responsibility of the customer.

## TREE TRIMMING

To increase safety, reduce outages, and prevent expensive damage, LPEA will periodically trim or remove vegetation from the electric line right-of-way.
